

## Security Education and Awareness

### Your Security is Our Priority

Every day your business is exposed to a variety of risks. Studies show that sixty percent of businesses that are attacked by ransomware are out of business within six months.

Hamilton security education will keep you and your employees informed on the latest tech and security threats, and provide effective solutions to mitigate the risks to your business.

Network Sentinel security education provides a pathway to mitigating human error, and better securing your network. Freeing you up to focus on core business functions, and trusting your staff is operating under a strong security policy.

A regularly maintained network means fewer failures, yielding higher productivity and savings on support costs for you. Don't be a statistic; be in the know. Empower your employees with the information they need to ensure your operation is secure.

### PROGRAM ADVANTAGES

#### TECH TIPS IN YOUR INBOX

Monthly E-Newsletter featuring important information, ensuring you are aware of the latest threats and preventative solutions.

#### TRAINING YOUR EMPLOYEES

Customized online training and testing materials to help your team operate under standard technical security protocol.

#### ON-SITE AUDITING

Hamilton security specialists will audit the physical and data security of your business by checking points of entry, access, sensitive material handling and other areas of risk.

#### REPORTING

Reports detail efficiencies gained, neutralized threats, and other averted risks.

# Security Education, Training and Implementation Solutions

Hamilton has a full suite of security solutions that will provide the tools and information to protect your business and livelihood from ransomware and other threats.

## Anti-Virus Protection

One of the most important tools to keeping your computers and business data safe. Hamilton anti-virus software provides real-time reporting to block and neutralize potential threats.

## Data Backups

Backups are the best tool against the majority of data loss threats. Hamilton can show you how to implement a strong data backup plan ensuring your data can be retrieved no matter what the situation.

## Security Training

Are your employees trained correctly as it relates to cyber security? Employees, and innocent behavior are by far the greatest threat to a company's data. Hamilton provides staff education that will train your employees to recognize behaviors that threaten your company's digital assets.

## Premise Security

From video cameras to biometric-based entry control points and everything in between, Hamilton offers security solutions that enable you to monitor your buildings and ensure only individuals with permission will enter your premises.

## Patch Management

Management of the operating system is imperative to keeping your vulnerabilities at the lowest levels possible. Hamilton has the tools that give you the comfort of knowing that the vulnerabilities of the operating systems on ALL of your machines are being monitored and taken care of 24x7x365.
