

## Your Security is Our Priority

### A Comprehensive Approach to Cybersecurity

Every day your business is exposed to a variety of risks. Studies show that sixty percent of businesses that are attacked by ransomware are out of business within six months.

Hamilton security programs equip your business with the knowledge and infrastructure necessary to protect it for modern day operations. Our team of experts is ready to help better secure your business with tools ranging from comprehensive security assessments to staff training and customized, monthly reporting.

Our team analyzes both network and data operations as well as facilities and physical assets. We design a solution that strengthens your overall security set-up and policies while meeting the unique needs of your business. As a true comprehensive approach to business security, this service provides a pathway to mitigating human error, protecting what matters most, and frees you up to focus on core business functions.

A regularly maintained network means fewer failures, yielding higher productivity and savings on support costs for you. Keeping your employees informed on the latest tech and security threats and providing effective solutions helps mitigate risks to your business.

**Don't be a statistic; be in the know.**

Empower your employees; strengthen your security infrastructure; protect your business with Hamilton.

### Program Advantages

- Internal Vulnerability Assessments
- Physical Security Assessments
- Security Training
- Public Information Profiling
- Security Policy Updates
- Reporting
- External Penetration Testing (EPT)
- Phishing Simulations

# Keep Your Business Connected and Protected

Hamilton has a full suite of security solutions that will provide the tools and information to protect your business from ransomware and other threats.

## Internal Vulnerability Assessments

A complete overview of network to data operations. Designed to pinpoint existing vulnerabilities and provide key insights into your existing cyber security infrastructure.

## Physical Security Assessments

A Hamilton security specialist will review the physical and data security of your operation ensuring security deficiencies are identified.

## Security Training

Hamilton provides staff education that will train your employees to recognize behaviors that threaten your company's digital assets.

## Public Information Profiling

An in-depth review of publicly accessible information associated with your business to evaluate risk exposure will help you gain insight into potential attack vectors and internal company data that may be targeted.

## Security Policy Updates

Our team of security experts will help you craft customized security policies to equip your employees with the standards, tips and knowledge they need and ensure your business is not just covered today but tomorrow as well.

## Reporting

Monthly, custom reporting providing your team with a full scope of protections, performance and policies. With regimented reporting you will be able to see exactly where your updated system fended off threats, maintained connection and protected your business on a day-to-day basis.

## External Penetration Testing (EPT)

Do your company website and online data have exposed entry points? Our team of EPT experts can identify vulnerable points of access and help you navigate an implementation plan for a more secure network.

## Phishing Simulations

Customizable testing campaigns designed to enhance your employees' understanding and handling of phishing emails. As the top social attack on businesses, the time to better prepare your staff is now.

## About Hamilton

Since 1901, we have been meeting the ever-changing connection, communication and technology needs of our customers.

## Experience

- 120 year history of managing reliable networks
- Robust telecommunications infrastructure
- Wide range of regulatory experience
